## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1 and 4 are allowed.

### ***Reasons for Allowance***

Claim 1 is allowed since there is no prior art of record that teaches a liquid crystal display comprising:

- at least two electrode links, each extended from the pixel area wherein one electrode link is longer than the other electrode link;
- a transparent electrode in contact with the driving circuit and electrode pad, wherein the transparent electrodes of the at least two pad members have different lengths, and the transparent electrode associated with the longer electrode link is longer than the other transparent electrode in order to compensate for a resistance difference between the two electrode links due to their different lengths.

Claim 4 is allowed since it depends on the allowed claim 1.

### ***Conclusion***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
